ADVANTAGES	<ol style="list-style-type: none"> <li>1. Economical film with a soft &amp; non-woven FABRIC visual and touch</li> <li>2. Ideal for badges, professional, sports and fashion clothes</li> <li>3. Freedom to create any badges from photos, with small letterings, with gradient, endless colors, complex patterns</li> <li>4. High Washing resistance up to 60°C (40°C for nylon)</li> <li>5. A professional quality with vibrant colors</li> <li>6. Suitable to any types of sublimation inks</li> <li>7. Possibility to cut out the contours thanks to a plotter with an optical eye function, also with laser cutting</li> <li>8. Universal thermoadhesive with excellent proven bonding on most textiles</li> <li>9. Ecofriendly, water based, solvent and PVC free polyurethane, textile woven in France</li> <li>10. Low carbon profile manufacturing: all operations made under one roof</li> <li>11. 100% made in France, out of european raw materials.</li> <li>12. Last generation machines and exclusive manufacturing process</li> </ol>	
USER'S GUIDE	<ol style="list-style-type: none"> <li>1. With a sublimation printer, print in mirror on sublimation paper with the crop marks (also in mirror)</li> <li>2. Transfer your printed visual from the sublimation paper to Liberty Patch with a heat press at 190°C-50 seconds. Hot peel</li> <li>3. You can cut out the contours of Liberty Patch Subli with scissors or thanks to a plotter with an optical eye function. Set up the blade to cut only the print film, and not the carrier, then weed.</li> <li>4. Then put the visual (separated from the carrier) on textile, so you can see the visual, protect it with baking paper and press at 150°C -20 seconds (adapt temperature and time according to textile) Hot Peel</li> </ol>	
WASHING TEMPERATURE	up to 60°C (40°C for nylon)	
FURTHER RECOMMENDATIONS	<ol style="list-style-type: none"> <li>1. Wait 24 hours before washing.</li> <li>2. Do not use bleach or other aggressive chemical agents.</li> <li>3. Iron from inside.</li> <li>4. Store our products in a tempered and dry room, protected from direct sun rays.</li> </ol>	
SAFETY	Inert components, REACH compliant, without PVC, plastifiers, heavy metals, VOC, according to Oekotex Standard 100 Class 1.
